Editorial Points of View

Organic Gardening empowers readers to lead simpler, more efficient lives and to make positive connections with their world through their gardens. We celebrate that connection with articles that feature the good things that come naturally in life—ideas for home-cooked meals, innovative ways to preserve the harvest, and inspiring destinations around the world, demonstrating how the garden can inspire readers to truly live their whole lives.

Simply Fresh
Organic Gardening’s Visiting Chef Ed Lee, Chef/Owner of 610 Magnolia, Louisville, KY, introduces readers to bright new ways to prepare your favorite home grown and farm-to-market fresh foods.

Bibendum
Sharing the joy of drinking—organically, sensibly and knowledgably, and visiting the vineyards, boutique breweries and organic orchards where wholesome drinks are born.

Common Ground
Exploring what living lightly from the ground up™ means, this section provides readers with expert insights into the world of organiculture, informing about the issues and controversies that are at the forefront of modern living.

Flower Power
Herbs have long had a dominant place in the home garden and this department explores their use, as well as traditions and innovations for health, beauty and holistic homecare, straight from the organic garden.

Design Dilemmas
Our favorite landscape design experts provide their hands-on knowledge to help you find the best solutions and innovative design to make the most of your garden’s potential.

Plant TNT
The best way to have a healthy garden is to find the best plants to suit the site. Each issue we present readers with the plants that best meet a specific garden need and give the most “bang for your buck”, featuring perennial plants, shrubs, trees, bulbs and more.

Earth Matters
News and views related to the environment, keeps readers up-to-date with the most relevant information on matters effecting life on the planet.

Small Green America
A celebratory travel guide of those small towns across the United States—and beyond—that embody the principles of this good, organic life.

Skills And Abilities
Gardening is a global language, and this important section provides readers with guidance about the skills every gardener should know and acquire, gathered from gardens and gardeners world-wide.

We Like This!
